Mr. Gary Burns
Facility Manager
Laidlaw Environmental Services
2549 N. New York
Wichita, Kansas 67219

Dear Mr. Burns:

RE: Laidlaw Environmental Services

Wichita, Kansas KSD007246846

Your Resource Conservation and Recovery Act (RCRA) permit (Part I) was issued on March 3, 1995, and became effective on April 7, 1995. Accompanying your hazardous waste operating permit was a corrective action permit (Part II) issued under the authority of the Hazardous and Solid Waste Amendments (HSWA) to RCRA. Section VII.4 of the corrective action permit requires the submittal of a RCRA facility investigation (RFI) workplan within 120 calendar days of notification. This letter constitutes official notification of the requirement to submit the workplan within 120 calendar days of receipt of this letter.

Please refer to Section VII of your corrective action permit for more information concerning the scope and content of the RFI workplan. Note that Section VII.4.B.4 provides an opportunity to delay the investigation of six solid waste management units (SWMUs) listed on page 22 (Part II). If you choose to delay the investigation of these SWMUs, please designate the workplan as the Phase I workplan to signify that a later Phase II workplan will be required.

In previous discussions with Mr. Ron Robertson of (then) Hydrocarbon Recyclers Inc., EPA's RCRA program agreed to consider work done by the facility under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) as overseen by either the Kansas Department of Health and Environment (KDHE) or the City of Wichita. EPA does not intend for the facility to duplicate work in accomplishing the RFI. Work done under the CERCLA process should normally be acceptable for RCRA purposes. However, please note that RCRA may require additional work if the CERCLA work doesn't adequately cover the SWMUs listed in the permit, doesn't include all appropriate chemical constituents, doesn't meet the objectives stated in the HSWA permit, or if the data quality is inadequate.
